

IRONSIDE NEWS

First crop of hay is up and farmers are harvesting their grain getting ready for second crop of hay. Duncan Bros. are now running their combine harvester. Mrs. Nancy Rutherford who has been visiting friends and relatives at Ironside the past week returned home Saturday. Mr. and Mrs. Bert Neighen, I. K. Dean, Mrs. Grace Rutherford and

daughter, Vady, of Malheur district, were Ironside visitors going to the mountains via Whitney. Mr. and Mrs. Willis Woodcock were called to Baker Monday where Mr. Woodcock's father was not expected to live. W. R. Lofton took them. Mr. and Mrs. J. P. Smith and Thelma Smith of Brogan, Mrs. H. C. Elms, Mr. and Mrs. Raleigh Vanburn, Mr. and Mrs. H. F. Elms and Mrs. Charles Elms of Hereford, and Mrs. Floyd White of Unity returned home Monday from a 10 days camping trip finding huckleberries very scarce. Mr. and Mrs. Fred Lawrence attended the barbecue and dance at Bonita August 11. Reported a royal good time. Fred Nelson of Unity is visiting friends at Ironside this week. Jody and Mills Lawrence, G. A. Tureman motored to Unity Tuesday. Mr. and Mrs. Alva Lawrence of Unity have been visiting Mrs. Lawrence's parents, Mr. and Mrs. W. H. Lofton, since Wednesday. Ralph Harvey returned the first of the week from Kansas City where he shipped his cattle. Mr. and Mrs. E. J. Beam and Mr. and Mrs. Will Beam of Nyssa returned home from a huckleberrying trip on Dixie mountain Thursday. Mr. and Mrs. Fred Lawrence and Mrs. G. A. Tureman went out to Ontario Tuesday on business. Mr. and Mrs. Arthur Nichols and son Orval returned home from Blue Mountain Springs and huckleberrying trip Monday. H. C. Elms and son Frank left for Ontario, Oregon and Star Idaho Friday on business. Mark Rutherford was an Ironside visitor Tuesday for extras for moving machine from Malheur. Mr. and Mrs. Fred Lawrence attended the dance at Brogan Saturday night. John Smith of Brogan was an Ironside visitor Friday.

MARRIAGE LICENSES ISSUED DURING WEEK
Joe Ingram and Pauline Coad, August 16, 1921

COMPLAINTS FILED IN CIRCUIT COURT DURING THE WEEK
Idaho Power Co. vs. Randall Sage, Aug. 15, 1921. Recovery on Account, \$273.62.
Perry James et al vs. N. E. Mogensen, August 18, 1921. Recovery on Account \$490.00.
Winkleman Bag & Burlap Co. vs. Cathey & Sage, August 20, 1921. Damages, \$833.33.
George England et al vs. Geo. Frank and J. F. Doty, August 20, 1921. Damages, \$2,000.00.

FARM REMINDERS
The tents of fall web worms may be cut out or burned during the day as soon as found. Where infestation is general a lead arsenate spray, 4-100, may be used. The injury is similar to that of tent caterpillars but the tent is larger and more gauze like. A quick flame of insufficient duration to injure the tree will kill the worms found feeding under the tent.—O. A. C. Experiment station.

Sunflowers that were grown on dry land need water when put in the silo. If they are green, immature, and full of water as they were in the fall of 1920, it is better to let them wilt before putting them in the silo.—O. A. C. Experiment Station.

Fall wheat, oats, and barley should be cleaned free of weed seed, treated with formaldehyde, and planted late in September or early in October in the Willamette valley. Recommened rates of seeding on good land are: wheat, 1 1/2 to 2 bushels; barley, 2 bushels; oats 2 to 2 1/2 bushels. For oats and vetch 40 pounds of oats with 60 to 80 pounds of vetch have been found satisfactory.—O. A. C. Ex. Station.

The following varieties of wheat are recommended by the O. A. C. Experiment station because they have been found to yield well: Western Oregon—white winter, Rink, Foise or red chaff, and Kinney less highly; Eastern Oregon dry lands—turkey red and hybrid 125; Eastern Oregon irrigated lands—Hybrid 125, forty fold, and on some rich soils where winter conditions are very severe, Turkey red. These lots contain no seven-headed, wild goose, mummy, miracle, or wonder or super wheats, as these have failed in actual trial to yield well in Oregon.

Low Cost Mileage For the Big Car

Every Fisk Tire is a guarantee that you will get mileage at a low cost. For satisfaction, safety and economy you buy a "sure thing" when you buy Fisk Tires. You are safe when you buy a known and reputable product at a low price

THE EARLY BUYER GETS THE BEST COAL

Coal quality depends a little bit on whether or not it's mined and screened under normal conditions. The early buyer can be certain of coal mined under ideal conditions—the late buyer takes a chance. This is sure—the best coal goes first when it comes to a "run" on the coal yards. Naturally those buyers who know will demand.

JESSE KNIGHT'S SPRING CANYON COAL

That's the first choice of the people who have tried it or whose friends have tried it—a clean, hot burning coal that stays in the lump or egg lump and keeps well.

Every Potato Means Additional Profit

When the price per bushel you receive for your potatoes is low, good profits can still be made by saving time and labor and by getting every potato in the field. It costs you no more to harvest completely, and you get the extra dollars for your increased crop, if you use a

HOOVER POTATO DIGGER

The Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. This digger has proved to be an especially good investment to all potato-growers who have used it. The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers. The vine-separating rear rack has a backward and forward motion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at

the rear of the machine, while the vines and trash are deposited at one side. Six roller bearings and wide tires on the wheels assure light draft. Patented Double-Action Front Truck permits the digger to be turned in a very short space. Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear. Don't fail to see the Hoover Potato Digger before you harvest your potato crop; its use means greater profits. Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions, and any other potato tools you require.

STOP Club Member Lives Here! See My CHICKENS

This particular sign appears on the gate at the home of Georgia Rust out on the Owyhee. The Owyhee Poultry Club had stopped here on Thursday afternoon, August 18, to inspect the pure bred White Leghorn chickens, belonging to Georgia. The members of this club are Nina Smith, Laura Huffman, Georgia Rust, Elizabeth and Robert Kaylor. Mrs. Chas. Schweizer is the local leader and was conducting the field trip on this day. Mrs. T. M. Lowe and daughter, Marion, Della Schweizer, Rowena Glenn, Kenneth McDonald and County Club Leader Wellman were also members of this inspection party. Each club member's chickens were visited and suggestions offered on the feeding and management of the chickens. The proposition of exhibiting at the county fair will command the attention of every club member for the next month. Every member of the Owyhee club has signified her or his intention of exhibiting a cockerel and four pullets at the fair. A pure bred White Leghorn club and a determination to win will go a long way in compelling the judges to give due consideration to the exhibits of these enterprising young poultry raisers.
